

# JBL PREMIUM AUDIO IN THE 2016 TOYOTA PRIUS

10 SPEAKERS IN 6 LOCATIONS, 432 WATTS, 6-CHANNEL, Hi8 AMPLIFIER

# JBL PREMIUM AUDIO IN THE 2016 TOYOTA PRIUS

## HIGHLIGHTS

- 10 Speakers in 6 Locations
- 6-channel, high-voltage class-H DSP amplifier producing 432 equivalent watts
- New 170 mm front door subwoofers provide a more forward presence, increased midrange attack, and more powerful sound
- Improvements to acoustic tuning and speaker placement, allow a more even sound stage with increased width
- Center sound image is more natural and better defined

## GREENEDGE™ TECHNOLOGY

GreenEdge

- › **Power Savings** – System enhancements that reduce power consumption and improve the audio performance.
- › **High-Efficiency Designs** – A system that creates a higher level of sound pressure allowing you to crank up the music without any distortion.
- › **Heat Reduction** – High-performance amplifier and speaker components generate less heat than traditional designs.
- › **Weight Savings** – Lightweight, high-performance materials maximize component and vehicle weight reduction.

## THE JBL/TOYOTA PARTNERSHIP

- New, advanced objective tuning process, employing state-of-the-art tools
- Since 1996, Toyota and JBL have been working together to deliver outstanding audio performance in a wide range of Toyota vehicles
- Today, JBL sound is available in 15 Toyota models, from SUVs to sedans to hybrids
