**The Maintenance Menu provides a vehicle specific summary of your vehicle’s maintenance requirements. Visit [www.toyota.ca](http://www.toyota.ca) or ask your Toyota Service Advisor for your personalized copy.**
Required Maintenance

**REGULAR MAINTENANCE SERVICE**
Your Toyota requires the following regularly scheduled maintenance at the interval indicated on page 25.

**OIL & FILTER SERVICE**
- Replace engine oil & filter.
- Remove & inspect air filter element (Replace if needed).
- Lubricate locks, latches & hinges.
- Inspect lights, horn & wipers for proper function.
- Inspect coolant, brake & washer fluid levels.
- Inspect tires & adjust pressure as required, including spare. Rotate tires if needed.

**MAINTENANCE SERVICE**
- Replace engine oil & filter.
- Remove & inspect air filter element (Replace if needed).
- Lubricate locks, latches & hinges.
- Inspect lights, horn & wipers for proper function.
- Inspect coolant, brake, and washer fluid levels.
- Inspect automatic transmission, manual transmission, hybrid transaxle, differential and transfer case for leaks.
- Inspect battery service and comprehensive electrical charging system evaluation (except Hybrids).
- Inspect valve clearance audibly.
- Inspect drive belts for damage. Adjust belt tension if required.
- Inspect steering linkage and suspension parts for looseness, damage or leakage.
- Inspect ball joints & dust covers, drive shaft and steering rack boots, chassis nuts & bolts for looseness or damage.
- Tighten rear driveshaft inboard constant velocity joint nuts (if applicable).
- Remove wheel and brake drum if equipped. Inspect brake linings, drums, pads, rotors, calipers, lines and hoses.
- Inspect exhaust system, fuel lines & connections, fuel tank vapour vent system hoses, fuel tank bands and fuel tank cap gasket.
- Inspect tires & adjust pressure as required, including spare. Rotate tires if needed.
- Road test.

**SPECIAL OPERATING CONDITIONS**
If you primarily operate your vehicle under any of the following conditions, please refer to additional maintenance requirements, shown below:
1. Short trips of less than 5 km (or less than 8 km in temperatures below 0°C).
2. Towing a trailer, using a camper or car top carrier.
3. Driving on dusty or muddy roads.
4. Frequent mountainous driving.

**ADDITIONAL MAINTENANCE REQUIREMENTS**
- Inspect brakes, steering and suspension components every 6 months/8,000 km.
- Inspect driveshaft boots, propeller shaft and body/chassis bolts, every 6 months/8,000 km.
- Change manual transmission, transfer case and differential fluids every 24 months/32,000 km.
- Replace automatic transmission fluid every 72 months/96,000 km (for condition #2 above, only).

**OFF-ROAD MAINTENANCE REQUIREMENTS**
If you are operating a four-wheel drive vehicle in off-road conditions, and have driven through deep sand, mud or water, you must immediately have the above additional maintenance requirements performed, as well as change all fluids, and lubricate suspension parts.
