<b>HOW WE TEST:</b> Overall Score is based on about a dozen tests, with braking, handling, and hydroplaning resistance more heavily weighted for many tires. Braking tests on ice are from 10 mph; on dry and wet pavement, from 60 to			0 mph. Handling combines how well a tire performed in the wet-handling test, steering feel, and an emergency handling maneuver. Hydroplaning denotes a tire's ability to resist skimming along the surface of standing			water. Snow traction tests denote how far a vehicle has to travel to accelerate from 5 to 20 mph on moderately packed snow. Ride and Noise are evaluated subjectively on rough and smooth roads. Rolling resistance, as measured			by a dynamometer, is a factor in fuel economy. Tread life is projected from a 16,000-mile vehicle test run on public roads in Texas for many tires. Price is approximate retail.
