Instruction Guide:

1.Power the camera

- (1) Inset a power cable to the red connector of the camera.
- (2) Connect the red wire of the power cable to the positive power of reversing light.
- (3) Connect the black wire of power cable to the ground.

2.Power the Monitor

There are two way you can choose one to install the monitor.

- (1)You can connect the car charger to the red connector from the monitor, then insert the car charger to the cigarette lighter of your car,so the monitor will get power.
- (2)Or you can get power by hard wiring,connect the power cable to the red connector from the monitor,then attach the red wire to the car reversing switch.Attach the black wire to the ground.

3.Connect the camera to the monitor by 26ft RCA video cable.And ignore the two small little wire on the RCA cable.

4.Pls keep this instruction or write down our email
Toerapta@163.com.
So you can find us once you have any question.

5.If you connect the camera to reversing light,the camera and monitor will be work only for reversing,so the screen will be on when you reverse,it will turn to image from black once you reverse.If you install the screen by the car charger and the screen is black,don't worry,it's normal.Please try to reverse the car,because the screen and camera will be on only when you reverse.You also can contact us if you meet any question,our email is Toerapta@163.com.We will solve the issue,don't worry.

😊 Trouble shooting

1.Q:The screen is black after installation,what can I do?

A:The camera and screen will be on when you reverse if you connect the camera's power to the reversing light.So please try to reverse the car,then both will be on.Pls contact us if you have any question anytime,our email is **Toerapta@163.com**.We will solve the issue you meet.

2.Please connect the camera to the reversing light,so it work only for reversing,if you connect its power to constant power or running light,it will be on all the time once you turn on the car.

3.Please sure the connection is tight,and the LED light will be on when it works,so if you connect its power to reversing light,the LED light will be on when you reverse.

4.If anything defective or disappear,please contact us via email **Toerapta@163.com**.We will solve it and give you satisfactory solution within 24 hours.

5.Please don't open the cover of camera,it will be not waterproof anymore if it's opened
