

New windshield on stand

New windshield with a glasscup installed

Sticker on windshield to be used by the alignment camera after the glass is installed

Black plastic molding removed (on top of car) revealing white plastic clips

Rope machine used to break the seal between the glass and window frame

Rope machine used to break the seal between the glass and window frame

Rope machine used to break the seal between the glass and window frame

Technology components (camera, sensors, etc.) that were attached to the original windshield. The black strip on top is the adhesive in process of removal. The tech used a putty knife to remove the adhesive around the perimeter of the glass

The tech applying around the perimeter for the new glass

The tech installing the new glass

The first step setting up the Bosch CTA 410 alignment rig

The alignment rig
The square boxes on the tripods contain 3 cameras each

Note that the code (CTA 410-3) indicates that the tech needs to attach 3 alignment targets

3 alignment targets added to the screen

Glass ID on the windshield that was replaced by previous owner

Glass ID on new windshield
